Infrashape Horizontal

Horizontal vacuum recumbent bike

VacuActiv

Underpressure

Generated by a specially designed vacu pump, which increases several times the efficiency of each training session.

80%

Loss of cellulite

Eliminates cellulite **up to 80%**

25%

Reducing circumference

reduction in circumference **from 8 to 20 cm**

Maximum underpressure

up to

30 mBar

- supports fat burning,
- slims and shapes the figure,
- improves blood circulation (smooth, elastic and firm skin),
- improves the functioning of the circulatory and lymphatic systems.

Infrared IR

Modern radiators provide the full spectrum of infrared radiation IR-A, IR-B and IR-C. They deliver healing thermal radiation directly to the deep subcutaneous layers. In this way, they accelerate the metabolic process, dilate blood vessels, improve blood flow and oxygenate tissues.

80%

Loss of cellulite

Eliminates cellulite **up to 80%**

50%

Reducing pain

cut osteoarthritis-related pain **by more than 50%**

Maximum IR radation

up to

1400 nm

- cleansing the body of toxins,
- treatment of injuries and **rheumatism**,
- discharge of stress tensions,
- reducing the feeling of fatigue,
- fat burning,
- skin firming.

Specification

Size	**Height** 123 cm (48,43 inches) **Width** 117 cm (46,06 inches) **Length** 241 cm (94,88 inches)
Weight	190 kg
Power supply	230VAC / 50Hz / 1PH 110VAC / 50Hz / 1PH
Power consumption	2 KW
Infrared temperature	25-50°C
ELectric ajustable backest angle	Yes
Adjustable bike resistance	Yes
Under pressure range	0-30mBar
Touch display size	15.6-inch
